

ADA Accessible Scales

Finding the right accessible scale does not have to be complicated. CME Corp can help you compare wheelchair and stand-on scale options, understand which features align with new ADA accessibility requirements, and choose equipment that fits your space, budget, and patient needs.

Key Requirements (Per the U.S. Access Board)

Wheelchair Access

- ✓ Base width: **32-36 in. min**
- ✓ Wheelchair space: **36 in. wide min**
- ✓ Raised platforms may allow **32 in. width** up to **4 in. high**
- ✓ Pass-through depth: **40 in. min**
- ✓ One-end entry depth: **48 in. min**
- ✓ Side-entry depth: **60 in. min**

Platform & Ramp Safety

- ✓ Edge protection required on raised platforms
- ✓ Protection must be **2 in. high min** where required
- ✓ Ramp slope: no steeper than **1:12**
- ✓ Ramp edge protection required for drop-offs **0.5 in. or greater**
- ✓ Standing surfaces must be slip-resistant

Standing Supports & Controls

- ✓ Handrails/supports required on two sides
- ✓ Horizontal supports: **4 in. grip length min. 34-38 in. high**
- ✓ Vertical supports: **18 in. grip length min. 34-37 in. high**
- ✓ Controls must be operable with one hand and require minimal force
- ✓ Controls must not require tight grasping, pinching, or twisting

ADA-Compliant Wheelchair Scales

Manufacturer	SKU#	Dimensions (In Operating Position)	Capacity	Portability	Warranty	Other Certifications
