PRODUCT
GUIDE

800.338.2372
cmecorp.com

Built in the USA for durability, strength, safety, and performance. The MayaCart is offered in various heights and can be purchased with standard sets of drawers or as an empty shell for custom drawer configuration. It comes standard in Sky White and is also available in other colors: yellow, commonly used for isolation carts; blue, typically for anesthesia carts; red, the go to for crash carts; as well as dark blue and green options.

Drawer handles are designed for staff safety and are embedded with a silver ion antimicrobial additive to help reduce healthcare-associated infections (HAIs). Staff can organize drawer space with customizable, seamless trays designed for easy cleaning while the optional electronic lock, with an antimicrobial surface, automatically locks, making the cart compliant with regulatory standards. Additionally, quiet-close drawer glides can help improve patient satisfaction. The MayaSlim also features extra workspace with a standard pull-out surface and caster brakes that are easily controlled by pushing down on the brake mechanism.

A broad range of accessories are available to tailor the MayaSlim to the needs of your facility.

ANTIMICROBIAL ENHANCEMENT

We are committed to helping our customers maintain a clean and safe environment for their patients and staff. Drawer handles on all MayaCarts have a silver ion antimicrobial additive embedded in them and optional electronic locks feature an antimicrobial surface coating to help keep surfaces cleaner.
