PRODUCT GUIDE

mayacode

Built in the USA for durability, safety, and performance. The MayaCode Cart is designed to provide access to all the equipment, supplies and medication needed for emergency care. Constructed of heavy gauge steel, the MayaCode can withstand the most demanding clinical environment. It features bright red drawers to help staff quickly identify emergency supplies while easy-clean drawer handles with an embedded silver ion antimicrobial additive and optional seamless drawer trays help minimize healthcare associated infections.

MAYACODE CART OPTIONS

The MayaCode Cart is available in several heights to accommodate 21", 24", 27", or 30" of total drawer space. Drawer configurations can be customized with a mix of 3-inch, 6-inch, and 9-inch drawers to tailor the cart to your facility's needs.

The standard MayaCode includes a breakaway lock bar and 30" of drawer space, configured with (3) 3-inch drawers, (2) 6-inch drawers, and (1) 9-inch drawer. The cart also features a pass-through pullout work surface for additional workspace and quiet-close drawer glides.
